

MODEL	FMQZ-1200/2	FMQZ-2500/2	FMQZ-3000/2
Welding width	25mm (15mm)		
Welding length	1200mm	2500mm	3000mm
Cycle sequence	12sec	12sec	12sec
Voltage	220V, 50Hz, 1phase	220V, 50Hz, 1phase	1 phase or 380V, 50Hz, 3 phase
Power	4000W	6000W	8000W
Compressed Air	0.6Mpa		
Dimensions(mm)	1400x880x1510	2700x880x1510	3200x880x1510
Safety	Safety device for Hands & fingers		
Weight(kg)	450	600	650

Automatic Folding and Welding FMQZ series

FMQZ

The automatic folding and welding machine type FMQZ series are designed to make hem pockets, the folding and welding process is automatic, which saves time and protects the operator's hands and fingers. The hem size can be adjusted to 100 mm, the max sealing width is 25mm. There are two control systems for heating adjustment, temperature control and time control, the max temperature is 250°C. The FMQZ is equipped with optional banner extension tables.

Two side thermo impulse welding technology
 Heats only during sealing time
 Economical power consumption
 Precise and fast fabric welding
 Safe operation

Weld Types

Extension tables for increased banner length welding
 Machines available to 5 mt length

PLC control and touch screen
 Memory programs
 Maximum comfort design
 Automatic stop safety features
 CE approved

Two system heating controls
 Temperature control
 Max. 250°C
 Time control

Automatic folding and welding
 Uniform pressure and welding
 Clean and strongest seaming
