

## “The Photostory Binding Center”

Unibind's Photostory Book Creator uses a patented thermo activated glue that has the following advantages over conventional binding methods.

- **Clean & Safe**

Our Easysheets are coated with a heat activated glue allowing the album to be assembled and inspected prior to bonding. There is no need to wear gloves or protective gear.

- **Superior Bonding**

The thermo activated glue insures superior bonding. The combination of heat and pressure allows the glue to penetrate the fabric of photographs and bond's permanently.

- **Low Cost**

Our systems are designed to minimize operational error's. A single operator can create books in about one hour, conventional glue binding systems usually require a day to dry.
