MODEL

CWT Pro Cutter 160

PART NO

CWT-726823 CWT Pro Cutter adds to the equipment an integrated aluminum base with two different cutting tracks: one with a narrow groove for general purposes, to be used with the knife blade; and other with a built-in cut-strip to be used with the circular blade.

CWT Pro Cutter is also equipped with an integral lift and hold mechanism, which can be used from both sides to facilitate the material loading.

CWT Pro Cutter features a revolutionary dual cutting head system to allow the user to have two different cutting heads installed at one time and block them if required.

The different cutting heads available provide the equipment with a great versatility and productivity.

- User-friendly machine easy and simply to install.
- Plastic strip for sight line to visualize the cutting line.
- Cutting thickness up to 20 mm for semi-rigid materials.
- Dust free operation to safely work close to printers.

FACTS

Cutting features

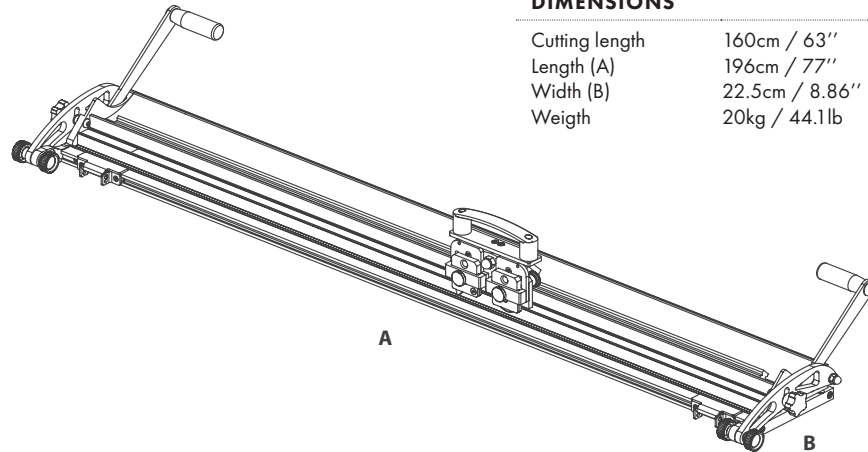

SEMI RIGID	Maximum Thickness	
Foamboard	13mm / 20mm*	0,51" / 0,78" *
Cardboard	13mm / 20mm*	0,51" / 0,78" *
PVC	5mm / 10mm*	0,20" / 0,39" *
Honeycomb	13mm / 20mm*	0,51" / 0,78" *
Corrugated plastic	13mm	0,51"
Mountboard	3,5mm	0,14"

*Optional accessory required.

FLEXIBLE MATERIALS

Fabric / Textiles
Plastic film
Banner materials
Paper
Vinyl
Magnetic sheet

MODEL

CWT Pro Cutter 160

LINEAR BEARING SYSTEM

The combination of the robust bearing block with the steel linear rail guarantees an accurate and smooth cutting head movement.

INTERCHANGEABLE CUTTING TRACK

Cutting position easily changeable in few seconds through the quick knob system.

ERGONOMIC HANDLE SYSTEM

Ergonomic handle system to comfortably cut in both directions.

FULL LENGTH GRIP STRIPS

Both the cutter and the aluminum base are equipped with full length grip strips to aid clamping and protect printed media.

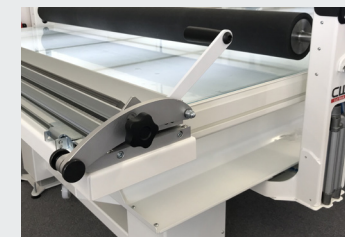

LIFT AND HOLD MECHANISM

Useful and comfortable handle system to raise the cutter bar.

BLOCKING THE BLADE

Possibility of blocking the blade at the cutting position to facilitate the cut of big sizes. No need of downward hand pressure.

CUTTER SHELF

Attach your cutter to the table end without interfering the work surface.
