

100% Recycled Sewing Thread

Advantages

- Stronger more durable so less breaking and less time lost in production
- Precisely engineered for consistent results
- Lower failure rate meaning lower returns and reworking
- Higher strength with finer thread for less perforation weakness
- Finer thread does not compromise performance
- Certified to Öeko Tex Standard 100 Class 1 the most stringent certification.
- Perfect for hemming PVC banners and printed textiles

Our recycled thread is an excellent match for our **Recycled Keder** for use in fabric frame systems.

Thermal Properties

Melts at 250 - 260oC, softens at 220 - 240oC

Shrinkage less than 1% @ 150oC

Thread Size Available in TKT - 40s, 80s and 120s
