

THERMAL TRANSFER LAMINATOR CREST 1600 TTL

CREST
Dutch Machinery

This 167 cm roll-feed hot/cold transfer laminator can be partnered with any digital toner printer. Using heat and pressure the laminator transfers the print's toner layer to self-adhesive marking films. The 1600 TTL will also apply overlaminates (clears) 'in line'.

For enhanced productivity, Crest's integral cooling unit and cutting device enables the entire image transfer and lamination process to be achieved in one combined operation: trimming the transfer paper, winding up the trim, transferring the image to the marking film, pulling off and re-winding the blank transfer paper, applying the overlaminate film, slitting the edges and final winding up of the completed graphics. All this at speeds of up to 70 cm per minute.

The floor-standing Crest 1600 TTL operates without compressed air and accepts sheet and roll materials up to 137 cm wide (54").

CREST 1600 TTL

SPECIFICATIONS

PHYSICAL CHARACTERISTICS

External dimensions (h x w x d)	Shipped	1860 x 2400 x 1050 mm
	Unpacked	1460 x 2210 x 780/1310 mm
Weight	Shipped	1300 kg
	Unpacked	1100 kg

PERFORMANCE

Operating speeds:

Transfer	recommended at 70 cm/minute
Laminating	variable up to 650 cm/minute

GENERAL SPECIFICATIONS

Front (heated)	1670 mm wide, 147 mm diameter transferring rollers from silicone rubber
Transfer opening	60 mm maximum
Rear (non-heated)	1670 mm wide, 110 mm diameter laminating rollers from silicone rubber
Laminating opening	60 mm maximum
Laminating material	All heat-activated and pressure sensitive materials

POWER REQUIREMENTS

Voltage	220-240V
Frequency	50-60Hz

INSTALLATION

Uncrating area	5300 x 3800 mm
Minimum operating area	3300 x 4400 mm

CERTIFICATION

Agency approvals	TÜV
	EMC: EN 50081-1/1992, EN 50082-1/1992

Details were correct at the time of publication. Crest Dutch Machinery B.V. reserves the right to alter specifications at any time.
